

Ture Invest Partners AB – No consideration of sustainability adverse impacts of investment decision on sustainability factors

Ture Invest Partners AB does not consider sustainability adverse impacts of its decisions on sustainability factors.

We have carefully evaluated the requirements of the “principal adverse impacts” (“PAI”) regime in Article 4 SFDR (the “PAI regime”) and Article 4 -10 and 12 in the Regulatory Technical Standards (Commission Delegated Regulation(EU) 2022/1288). We are supportive of the policy aims of the PAI regime: to improve transparency to clients, investors and the market, as to how financial market participants integrate consideration of adverse impacts of investment decision on sustainability factors. However, considering the nature of our provided products, we find that it would be disproportionate to comply with the specific PAI regime of the SFDR. However, we consider our present framework of analysis, data collection and disclosures appropriate and proportional to sustainability risks in the portfolio and the management thereof. For the avoidance of doubt, this is not intended to suggest that Ture Invest Partners AB considers sustainability adverse impacts within the meaning of the PAI regime.
